Flexible schedules for hybrid working

Enabling hybrid work can be difficult if not managed well. With flexible schedules, the employees can now easily plan their work from home/office in advance. Our application can be used for weekly or monthly hybrid planning and real-time working swap

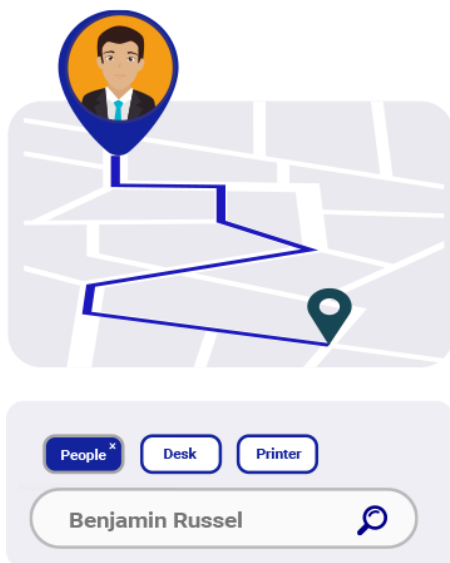

Faster check-in

Check-in to the workplace faster once you find out the required space. Later may scan the QR code attached to the desk and check-in instantly. Space policies ensure restricted checkin based on department or manager.

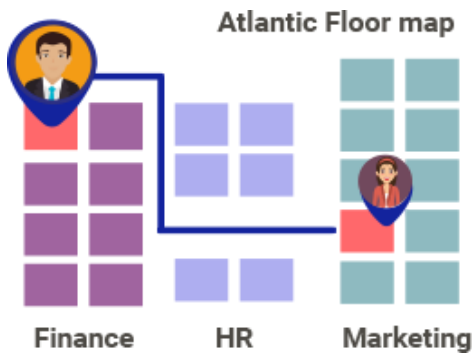

Seamless hosting & Visitor management

Now you can enter visitor details and choose a location, time and you are done, invitation along with QR code and unique visitor ID will be shared for contactless check-in

Colleague/Visitor finder Inside the campus

Find where and what your invitees are doing inside the premises while they are visiting. Also, know who has checked in to your neighbourhood and find the perfect spot for you to collaborate with the team.

Checked-in history on nearby floor

Find last 24 hour check-in history of colleagues in the nearby floor. users can always Opt in/out always to share or not your location privacy.

Add to favorite workplaces & people

Locate people & book spaces in one tap from favorite list of items on my profile settings
